

Thank you to all the club presidents and representatives that attended the event planning meeting on December 12, 2009 at our home in Brockville.

With the help of these dedicated individuals we were able to develop this mutually agreeable event list for the upcoming year.

Something new that was added this year was the addition of the flag marking certain events. The idea behind the flagged events is to promote zone interaction. We would like to promote members to attend flagged events when possible and bring a friend. The plan is for each club to have their flagged events supported by the membership and in turn support other clubs flagged events. Weekends where there are dual events we flagged one event for Saturday and the other event for Sunday.

Any questions please contact your club representative or your zone director.
